

Roger K Khouri, MD, FACS.

Jan 2025

Brief Biography:

Doctor Khouri has over 40 years of experience with breast reconstruction. Thirty years ago, while a Professor of Plastic Surgery at Washington University, he published what was then the world's largest experience with microsurgical free flap breast reconstruction. However, over the past 20 years, he has perfected much more patient friendly and minimally invasive alternatives that involve no incisions, no implants and no flaps. These procedures elegantly replace tissue cutting and tailoring with incisionless tissue forming and molding.

Dr. Khouri is a Worldwide recognized expert in fat transfer and tissue engineering. He is an innovator who has been awarded 45 patents, has authored over 150 scientific publications, and has been invited to give over 4000 lectures at major National and International Meetings. He has performed live demonstrations of his minimally invasive breast procedures at numerous meetings in all 5 continents. Dr. Khouri is a founder and past President of the International Society of Regenerative Plastic Surgeons (ISPRES).

Dr. Khouri practices plastic surgery at the Miami Breast Center, the private clinic he founded in Key Biscayne, Florida.
